

**Spoke with you before:**

**1.What is the status of this issue? Is it possible to achieve this?**

Million points:

This game is fed by random questions from the list used at Quiz Start. There's no logic to this, because the higher you climb on the reward ladder, the harder the questions become. Could you create a separate environment specifically for million points, just like you did with Word Game Questions? I could record 15 questions there and number them 1 through 15, with 1 being the easiest and 15 being the hardest. **Sorry!**

**2.Quiz results: What is the status of the motivational/outcome texts in relation to your score? So, if you answer 15/30 questions correctly, you will NOT see the "TbarkAllah excellent" text.**

**Feedback is now determined by percentage, not points.**

**Percentage = (Number of Correct Answers / Total Number of Questions) × 100**

**Examples:**

**15/30 correct = 50% → "Medium" message is displayed (no longer "Excellent")**

**24/30 correct = 80% → "Excellent" message is displayed**

**18/30 correct = 60% → "Good" message displayed**

**10/10 correct = 100% → "Excellent" message displayed**

**When 15/30 correct answers are given, the "TebarekAllah excellent" message will no longer be displayed; instead, the appropriate feedback message will be shown.**

---

**New:**

**1.Contact page: I want to add returns (Enter). How do I do that? I've tried <br> and <p>, but it's not an HTML piece.**

**Now when you create a paragraph, it will be indented.**

**2. Results page:**

**With a good score, you'll see confetti. This will now appear on the screen for 10 seconds.**

**Can you make that 3 seconds?**

**now 3 seconds**

**3. Results page: It now says 100 points. Can you also add the total, so you can see at a glance how many points you could have gotten and how many you score now? So, "100/300 points"**

**Like this:**

**Previous: Only points earned were displayed (e.g., "100 points")**

**New: Both points earned and total points are displayed (e.g., "100/300 points")**

**4. Results page: this is still in English**

**ok**

**5. Results page: Please show answers to the questions earlier ("Question details").**

**Please follow this order:**

**Name > Motivational text > Points/Total points > Question details > Ranking details > Social media sharing**

I rearranged the sections on the Results page in the desired order.

New order:

Name — Student name

Motivational text — Feedback message

Points/Total points — Points earned/Total points (e.g., 100/300)

Question Details — Question details and answers

Ranking Details — Statistics and ranking information

Number of correct/incorrect answers

Overall ranking

This month's ranking

This year's ranking

Social Media Sharing — Sharing buttons

**6. Results page: Can you change "Question Details (Vraag Details)" to "Resultaat per vraag"**

**ok**

**7. Results page + Oefenmodus:**

The "Suggest Correction" button is currently too prominent; eyes are immediately drawn to it, even though it's an optional extra. Please make the color less conspicuous, for example, the same color as the "button" where the question itself is listed.

**ok**

**8: Quiz results: Please change url/slug/page name**

<https://www.quizislam.nl/examen/resultaten>

to ...../quiz/resultaten

I changed this part

**Mobile version:**

**1. On your mobile device, you can see the quiz results and share your results. Deel je resultaat: .....<http://quizislam.nl>**

**>>>please make this just like the web version: <https://www.quizislam.nl>**

**may vary depending on the device**

**2. On the mobile version: could you make the "leaderboard details" more concise? It currently takes up a lot of space and requires a lot of scrolling.**

**So this section could be more concise: The leaderboard has been optimized for mobile devices.**
